B. There are 4 mistakes in the passage. Write out the line, the mistakes and correct them.

(0.6 m)

Line	Although party invitations no longer frightened to me, I still found making careful preparations for this particularly party. I got a haircut, laid out my best suit, selected a special shirt, tie, and cuff-links. I had recently gone on a diet, but because I didn't want to look too thin, I discontinued it. What should I bring my hosts? Flowers? wine? What kind of the wine? Port? Sherry? Or possibly even champagne? Meeting new people was still a major undertaking.

10	It was scheduled for this Saturday and I decided to take a cab to the suburb which it was being held. It was early autumn and the weather had been mild, but that morning it turned cold and rainy, and as I listened to the steam hissing in my radiator, it already fell like midwinter. From my newspaper, I learned that a hurricane which had already stricken another state was on its way to New York, though it might veer out to sea.

A Water Crisis

The Sahara's meager resources are being plundered right to the present day. (1) _____. The rock is of a type which hinders easy underground storage so the water supply depends on rainfall. This being so, it is easy to understand why it varies. However, the seriousness of the situation goes far beyond mere seasonal changes.

There is one district where observations go back at least 125 years. (2) _____. This way of drawing water is intended for the irrigation of gardens and small plots and works only if there is water not more than about five meters below the surface. Today, though, not one well of this type exists. They have all been replaced by wells from which the water has to be raised by draught animals, because it is now 25 meters down. (3) _____

In a classic example of a vicious circle, shortages of water have led to the digging of more wells to save the flocks and birds. As these have been deepened the water supply has been further depleted (4) _____

The Air region was once regarded as the Switzerland of Africa because of its temperate climate. It was criss-crossed by valleys filled with palm trees and was thronged with wildlife. Nowadays, though, there are only a third of the palms which existed there at the turn of the century. The amount of wildlife has shown a proportional fall. (5) _____. This is highly dangerous in a world where the overall population is growing rapidly. We cannot afford to lose fertile land.

- A. Here it is known that wells of the balance beam type were once used to cultivate areas.
- B. So, too, has the number of human beings who can now survive in the area.
- C. This has resulted in soil erosion which then dries out the land still further.
- D. Here, then, the water level has evidently dropped by 20 meters in little over a century.
- E. Such are conditions in the Sahara Desert in recent time.
- F. This is shown most clearly in the dramatic fall in the region's precious water reserves.

B. Read the following passages and choose the best answer. Write your answers in the numbered blanks provided below. (1.0 m)

One of the seven wonders of the ancient world, the Great Pyramid of Giza was a monument of wisdom and prophecy built as a tomb for Pharaoh Cheops in 2720 BC. Despite its antiquity, certain aspects of its construction make it one of the truly great wonders of the world. The thirteen - acre structure near the Nile River is the solid mass of stone blocks covered with limestone. Inside are the number of hidden passageways and the burial chamber for the pharaoh. It is the largest single structure in the world. The four sides of the pyramid are aligned almost exactly on true north, south, east and west – an incredible engineering feat. The ancient Egyptians were sun worshipers and great astronomers, so computations for the Great Pyramid were based on astronomical observations.

Explorations and detailed examinations of the base of the structure reveal many interesting lines. Further scientific study indicates that these represent a type of timeline of events – past, present, and future. Many of the events have been interpreted and found to coincide with known facts of the past. Others are prophesied for future generations and are currently under investigation. Many believe that pyramids have supernatural powers and this one is no exception. Some researchers even associate it with extraterrestrial beings of the ancient past.

Was this superstructure made by ordinary beings, or one built by a race far superior to any known today?

1. What has research of the base revealed?

- A. The lines represent important events.
- C. There are cracks in the foundation.

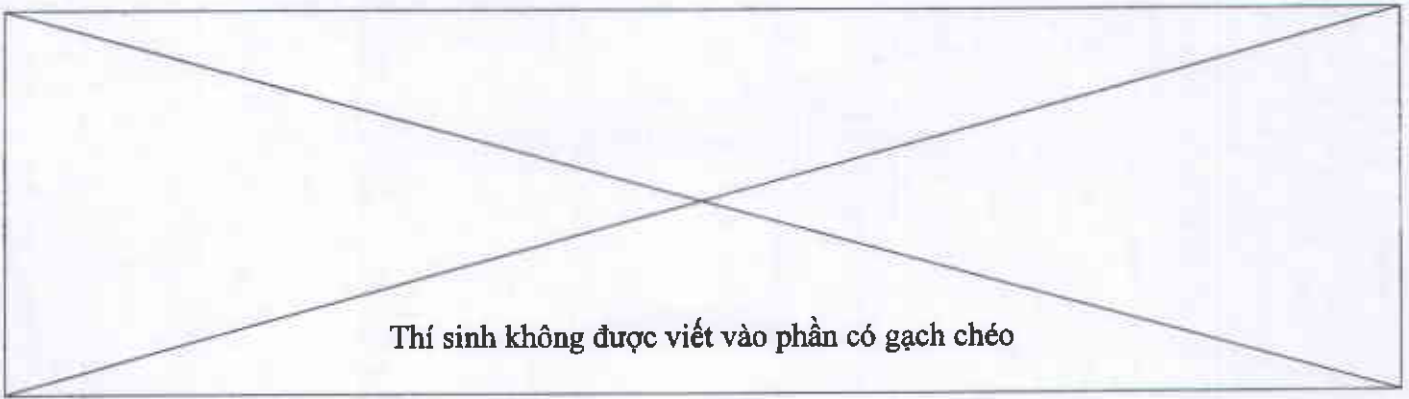

- B. Tomb robbers have stolen the pharaoh's body.
- D. A superior race of people built it.

2. Extraterrestrial beings are _____.

- A. astronomers in the ancient times.
- C. living beings from other planets.

- B. very strong wonders.
- D. researchers in Egyptology.

3. What is the best title for the passage?

TAPESCRIPT 1

Now to the weather across the Asian region. Beijing will be cool with late showers and a high of 15. Seoul will be cloudy and unseasonably cold at 4 degree while Pusan will see rain and a high temperature of 8 degree. Tokyo will have rain and a high of 11 and Osaka will be cloudy and 10 degrees. Shanghai is expected to enjoy clear skies all day. It will be breezy and warm with a high of 21. Further south in Taipei, the temperature stay around 16 degrees but there won't be much sun. Look for it to be partly cloudy. Hong Kong will stay cloudy all day long with temperature reaching 17 degrees. In Manila, it will be warm and sunny with a high of 27. And that's a look at the regional weather at this hour.

TAPESCRIPT 2

The spaceship flew around the planet several times. The planet was blue and green. They couldn't see the surface of the planet because there were too many clouds. The spaceship descended slowly through the clouds and landed in the middle of the green forest. The two astronauts put on their space suits, open the door, climbed carefully down the ladder, and stopped onto the planet.

The woman looked at a small control unit on her arm. "It's all right" she said to the man. "We can breathe the air... it's a mixture of oxygen and nitrogen". Both of them took off their helmet and breathed deeply.

They looked at everything carefully. All the plants and animals looked new and strange. They couldn't find any intelligent life.

After several hours they returned to their spaceship. Everything looked normal. The man switched on the control, but nothing happened. "Something wrong" he said. "I don't understand... the engines aren't working". He switched on the computer, but that didn't
